

Art/Computing

Sketch a river with a pencil using different tones.

Use Microsoft PowerPoint (or another suitable programme) to create your own vector images of plants and/or rivers.

Writing

Write a poem about a river. It could be based on a real river or a fictional one.

Create a fact file about an insect or a bird of your choice.

Geography: What is a river?

Science: Living things and their habitats

You may wish to take the time to complete a project at home this half term. The project should be based around either our current geography topic or science topic.

You can bring in completed projects at any point during the half term so that they can be shared with the class.

Here are some possible starting points, or you may have an even better idea for your project!

Do you have your own exciting idea for a project on this term's learning?

Geography

Visit the River Cam. What can you see? Can you find the River Cam on a map?

Draw a diagram of a river and label its key features.

Science

Compare the lifecycles of a range of different insects.

Find some flowers (in a garden or park). Can you find their parts and identify them? Can you tell an adult what their purpose is?
