

Creative – Art / DT etc

- Cut some fruit or vegetables in half and complete some observational drawings of the inside.
- Create your own fruit kebab and think about how you can make a pattern with the colours and shapes

Y2 - Autumn 1 – 2023

Science – Materials

Geography – Why does it matter where our food comes from?

You may wish to take the time to complete a project at home this half term. Here are some possible starting points, or you may have an even better idea for a project.

If you have completed a home learning project, please bring it into school to show us or send a photo to [smorris@arbury.cambs.sch.uk](mailto:smorris@arbury.cambs.sch.uk)

Creative Writing

- Imagine a world where everything is made out of one material! Can you write a story about what it would be like? What might go wrong?

Science/Geography

- Help adults at home to sort out the recycling based on the materials that have been used.
- Read food packaging to find out where your food comes from. You could write a list or find these countries on a map.

We will be reading *The Tin Forest* by Helen Ward.

You might like to:

- Paint/collage a picture of the tin forest or a forest of your own design.
- Find some exciting facts about a rainforest.
- Write your own version of the story.
- Create a new character for the story.

Your own Idea

Do you have your own exciting idea for a project?

Maths

- Count and record how many different materials you can find in your home. You could present your findings in a table, tally chart or a graph.
